

Custom Automotive Component Manufacturing

- Cobra 427 S/C was popular 1960's roadster
- U.S. firm developed Cobra replica kits
- Russian high-tech weapons manufacturer will produce specialty components for S/C kits
 - titanium and stainless steel mechanical parts
- Russian expertise will be combined with U.S. quality control practices
 - forging, casting, welding, and metal joining
- Growing U.S. and world market demand for customized, collectible automobiles
 - long-term goal to position Russian facility to attract large automotive after-market
